

Bill at Camp

It was the first time Bill went to camp. He was very happy to be there. Soon he went for a walk in the woods to look for many kinds of leaves. He found leaves from some maple and oak trees. As Bill walked in the woods, he saw some animal tracks. At that moment, a mouse ran into a small hole by a tree. Bill wondered if the tracks were made by the mouse. He looked around for other animals. He did not see any. The last thing Bill saw was an old bird nest in a pine tree.
